Agile AI Functional Elements v1.1

Canonical Institutional Release

Reference ID: AAF-FAE-1.1-2026

Issued: 2026

Canonical Source: <https://agileai.foundation>

Authority Declaration

This document constitutes the official constitutional artifact of the Agile AI Foundation. Canonical authority resides exclusively at <https://agileai.foundation>.

Version 1.1 formalizes the framework under the signed institutional governance baseline declared in February 2026. All subsequent revisions must advance the version number and be issued through a signed institutional release.

The Six Agile AI Functional Elements

1. Intent & Outcome Alignment

Agile AI systems must be explicitly aligned to clear intent and desired outcomes. AI capability exists to serve outcomes, not isolated outputs.

2. Human Judgment & Accountability

Humans remain responsible for direction, constraints, and ethical decisions.

3. Adaptive Execution

Systems must continuously adapt based on feedback and learning.

4. Continuous Learning & Feedback

Systems must learn continuously from outcomes and signals.

5. Governance by Design

Governance is embedded intentionally into Agile AI systems.

6. Systemic Integration

Agile AI operates as part of a broader socio-technical system.

Release Governance

Version 1.1 supersedes all prior drafts or provisional releases of the Agile AI Functional Elements framework. Amendments require formal version increment, archival publication, and institutional declaration.

Change Control

Modifications to this artifact shall be documented through structured version history. Unauthorized alterations invalidate constitutional status.

Archival & Permanence

This artifact is intended for long-term public reference. Historical versions are preserved through version-controlled institutional publication.

Release Integrity

The canonical source of this document is the HTML version hosted at <https://agileai.foundation>. Reproduced or redistributed copies must retain full textual integrity and citation reference.
